LETTER OF INTENT

To,
Vanshika Sabharwal
Freelance Software Engineer

Dear Vanshika,

This Letter of Intent is issued by **Bear Bags** (bearbags.in) to formally acknowledge and confirm the software engineering engagement carried out by you for our e-commerce web platform.

Purpose of Engagement: Design, development, testing, and deployment of the Bear Bags e-commerce web platform (bearbags.in), covering the complete project lifecycle from initial design through production deployment.

Scope Delivered: UI/UX design, frontend and backend development, database integration, CRM integration, quality testing, and production deployment — executed using an iterative model of design, build, test, review, and refinement.

Technology Stack: Next.js, Node.js, MongoDB, and Zoho CRM.

Status: As of the date of this Letter, Bear Bags confirms that the above scope of work has been completed and delivered to our satisfaction, and that the platform is live in production.

This Letter of Intent is a good-faith statement of our understanding of the engagement and is intended to be followed, where applicable, by a formal Service Agreement setting out complete terms and conditions.

Sincerely,

For Bear Bags
